VHF Marine and Dealer Programmable LMR channels

The HX370S is factory programmed with International Marine channel. It also has the capability to be programmed with 40 Land Mobile Radio (LMR) channels with CTCSS or DCS signaling by a dealer. These channels do require the appropriate license.

Features you expect and unique functions

The HX370S can be programmed to scan any number of channels with or without priority to channel 16 and also includes Dual Watch. The unique PRESET key allows you to easily recall 8 of your most used channels. A large clear LCD uses channel names to inform you of the use of each selected channel. The submersible jack on the top of the HX370S allows connection of optional headset or speaker microphones.

Included battery accessories

Standard Horizon supplies the HX370S with a 1400mAh Nickel Metal Hydride battery that will last over 18 hours (5/5/90) duty cycle (TX/RX/Standby) when transmitting on high power. Also included is a waterproof alkaline battery tray, 12VDC Charger, 230 VAC charger and a desk top drop-in cradle to charge the radio on shore or on your boat. Additionally, an easy to see battery life indicator on the LCD warns you when the battery needs recharging.

High Intensity Distress strobe light

The high intensity strobe light emits the internationally recognized SOS signal that can be seen over 1 km away at night... another **STANDARD HORIZON first!**
